

CONTENTS OF VOLUME 3

NUMBER 1

- | | | |
|--|----|---|
| David Hui | 1 | Editorial |
| Kostas P. Soldatos | 3 | Vectorial approach for the formulation of variationally consistent higher-order plate theories |
| S. F. M. Abd-El-Naby, L. Hollaway and M. Gunn | 19 | The tangential stresses in an infinite orthotropic composite plate with a loaded hole |
| Arie Cohen and Selim Yalvaç | 31 | Development and application of an impact fatigue test |
| B. Tabarrok and Liyong Tong | 43 | A mixed variational principle for buckling analysis of composite circular cylindrical shells |
| A. B. Doucet and J. Qin | 55 | Microstructural analysis of impact damage in two glass/epoxy composite laminates |
| H. Ho, M. Y. Tsai, J. Morton and G. L. Farley | 69 | A comparison of three popular test methods for determining the shear modulus of composite materials |
| James M. Whitney and Russell D. Kurtz | 83 | Analysis of orthotropic laminated plates subjected to torsional loading |

NUMBER 2

- | | | |
|---|-----|---|
| David Hui | 99 | Editorial |
| W. B. Tsai and T. Mura | 101 | Tensile fracture of fiber-reinforced composites: influence of thermal residual effect |
| D. Perreux and C. Oytana | 115 | Continuum damage mechanics for microcracked composites |
| Harry H. Hilton and Sung Yi | 123 | Anisotropic viscoelastic finite element analysis of mechanically and hygrothermally loaded composites |
| H. Murakami | 137 | Assessment of plate theories for treating the thermo-mechanical response of layered plates |
| Chun-Ying Lee and Dahsin Liu | 151 | Nonlinear analysis of composite plates using inter-laminar shear stress continuity theory |
| Aditi Chattopadhyay and Jay Ferreira | 169 | Design sensitivity and optimization of composite cylinders |
| Christopher M. Pastore, Alexander E. Bogdanovich and Yasser A. Gawayed | 181 | Applications of a meso-volume-based analysis for textile composite structures |

NUMBER 3

- | | | |
|--|-----|--|
| A. K. Tripathy and Su-Seng Pang | 195 | Deflection and stress analysis of stiffened orthotropic skew panels under uniform transverse loading |
| Cecil O. Huey, Jr and Gary L. Farley | 209 | Development of generalized 3-D braiding machines for composite preforms |
| H. H. Pan and G. J. Weng | 219 | Thermal stress relief by plastic deformation in aligned two-phase composites |
| K. H. Lee, Pascal B. Xavier and C. H. Chew | 235 | Static response of unsymmetric sandwich beams using an improved zig-zag model |
| M. Autio, M. Laitinen and A. Pramila | 249 | Systematic creation of composite structures with prescribed thermomechanical properties |
| E. J. Lang, J. M. Duva and C. T. Herakovich | 261 | A comparison of the plane-stress approximation and full three-dimensional stresses in notched unidirectional fiber-reinforced composites |
| Cheryl A. Rose and Carl T. Herakovich | 271 | An approximate solution for interlaminar stresses in composite laminates |

NUMBER 4

- | | | |
|---|-----|---|
| Saurin Majumdar, Dileep Singh and Jitendra P. Singh | 287 | Analysis of pushout tests on an SiC-fiber-reinforced reaction-bonded Si_3N_4 composite |
| J. B. Greenberg, Y. Stavsky and M. Sabag | 313 | Buckling of edge-damaged composite cylindrical shells subjected to radial pressure |
| Genady P. Cherepanov | 321 | On the use of protective aircraft thermohelmets for achieving high supersonic speeds |
| T. S. Srivatsan, A. Ravindra, J. M. Panchal and Amit Prakash | 329 | The cyclic fatigue and fracture behavior of ceramic-particle-reinforced tool steel metal-matrix composite |
| François Devries | 349 | Bounds on elastic moduli of unidirectional composites with imperfect bonding |

NUMBER 5

- | | | |
|--|-----|--|
| A. T. Nettles and D. G. Lance | 383 | On the enhancement of impact damage tolerance of composite laminates |
| E. O. Ayorinde and R. F. Gibson | 395 | Elastic constants of orthotropic composite materials using plate resonance frequencies, classical lamination theory and an optimized three-mode Rayleigh formulation |
| G. J. Simites, A. Tabiei and J. S. Anastasiadis | 409 | Buckling of moderately thick, laminated cylindrical shells under lateral pressure |

- | | | |
|--|------------|--|
| D. Bruno, S. Lato and R. Zinno | 419 | Nonlinear analysis of doubly curved composite shells of bimodular material |
| E. Rhian Green | 437 | Short duration impact loading on fibre composite laminates |
| R. Govindarajan,
A. V. Krishna Murty,
K. Vijayakumar and
P. V. Raghuram | 451 | Finite element estimation of elastic interlaminar stresses in laminates |
| Akihito Kasagi and
Srinivasan Sridharan | 467 | Buckling and postbuckling analysis of thick composite cylindrical shells under hydrostatic pressure |

NUMBER 6

- | | | |
|---|------------|---|
| K. Purazrang, P. Abachi and
K. U. Kainer | 489 | Mechanical behaviour of magnesium alloy MMCs produced by squeeze casting and powder metallurgical techniques |
| G. Singh, G. Venkateswara Rao
and N. G. R. Iyengar | 507 | Large deflection of shear deformable composite plates using a simple higher-order theory |
| K.-F. Nilsson | 527 | On growth of crack fronts in the DCB-test |
| M. R. Wisnom | 547 | Nonlinear analysis of misaligned unidirectional carbon fibre-epoxy compression specimens |
| N. N. Huang and T. R. Tauchert | 557 | Large-amplitude vibration of graphite-reinforced aluminum cylindrical panels subjected to rapid heating |
| J. M. Whitney | 567 | Analysis of anisotropic laminated plates subjected to torsional loading |
| | 583 | Announcement |

NUMBER 7-8**USE OF COMPOSITES IN AIRCRAFT**

- | | | |
|---|------------|---|
| D. Hui and S. Wu | VII | Foreword |
| A. Chattopadhyay and
T. R. McCarthy | 585 | Multidisciplinary optimization and design variable sensitivity of helicopter rotor blades using a composite box beam model |
| A. M. Rubin and K. L. Jerina | 601 | Evaluation of porosity in composite aircraft structures |
| C. B. York, F. W. Williams,
D. Kennedy and R. Butler | 619 | A parametric study of optimum designs for benchmark stiffened wing panels |
| Chun-Do Kim and C. W. Bert | 633 | Critical speed analysis of laminated composite, hollow drive shafts |
| P. Kavallieratos and R. Vaicaitis | 645 | Nonlinear response of composite panels of high speed aircraft |

H. H. Pan and G. J. Weng	661	Determination of transient and steady-state creep of metal-matrix composites by a secant-moduli method
T. Nicholas, J. L. Kroupa and R. W. Neu	675	Analysis of a $[0^\circ/90^\circ]$ metal matrix composite under thermomechanical fatigue loading
E. S. Greenhalgh, C. M. Pastore and M. Garfinkle	691	A continuous-fiber composite wing box-beam exhibiting twist-bend coupling
G. S. Daehn, K. Hebbar, Yeong Sung Suh and Hongyan Zhang	699	Nonisothermal deformation behavior of a high performance aluminum matrix composite
R. M. Measures	715	Fiber optic sensing for composite smart structures
G. J. Simites and J. Rezaeepazhand	751	Structural similitude for laminated structures
W. T. Freeman	767	The use of composites in aircraft primary structure
G. C. Grimes, E. G. Dusablon, R. L. Malone and J. P. Buban	777	Tape composite material allowables application in airframe design/analysis
D. A. Kourtides	805	Thermal performance of composite flexible blanket insulations for hypersonic aerospace vehicles
	815	Announcement

NUMBER 9

A. S. Abdelnaser and M. P. Singh	817	Random response of antisymmetric angle-ply composite plates with Levy boundary conditions
F. G. Yuan	835	Bending of filament wound composite laminated cylindrical shells
A. Thionnet and J. Renard	851	Meso-macro approach to transverse cracking in laminated composites using Talreja's model
Melanie P. Lutz and Mauro Ferrari	873	Compression of a sphere with radially varying elastic moduli
Kostas P. Soldatos	885	A nonlinear transverse shear deformable plate theory allowing a multiple choice of trial displacement and stress distributions
W. Wagner and E. Stein	899	A new finite element formulation for cylindrical shells of composite material

NUMBER 10

A. Vlot	911	Impact properties of Fibre Metal Laminates
W. B. Tsai and T. Mura	929	Micromechanics of matrix cracking in fiber-reinforced brittle-matrix composites

- | | | |
|--|-----|--|
| Seungjae Song and Anthony M. Waas | 945 | A nonlinear elastic foundation model for interlaminar fracture of laminated composites |
| Jiayu Xiao and Claude Bathias | 961 | Modified Tan's models for the strength prediction of woven laminates with circular holes |
| S. J. Hwang and R. F. Gibson | 975 | Prediction of fiber-matrix interphase effects on damping of composites using a micromechanical strain energy/finite element approach |
| C. L. D. Huang and H. Y. Lu | 985 | Nonlinear vibrations of orthotropic thick annular plates using higher order shear deformation theory |
| M. A. Khan and P. K. Rohatgi | 995 | A numerical study of thermal interaction of solidification fronts with spherical particles during solidification of metal-matrix composite materials |

NUMBER 11

- | | | |
|---|------|--|
| P. Fanning and L. Hollaway | 1007 | A case study in the design and analysis for a 5.0 m deployable composite antenna |
| James N. Craddock and Shing-Chung Yen | 1025 | The bending stiffness of laminated composite material I-beams |
| E. P. Fahrenthold and M. Venkataraman | 1039 | Continuum damage modeling of impact fracture in ceramic materials |
| Chihdar Yang and Su-Seng Pang | 1051 | Stress-strain analysis of adhesive-bonded single-lap composite joints under cylindrical bending |
| K. Bhaskar and T. K. Varadan | 1065 | A benchmark elasticity solution for an axisymmetrically loaded angle-ply cylindrical shell |
| A. Saigal, D. S. Kupperman, J. P. Singh, D. Singh, J. Richardson and R. T. Bhatt | 1075 | Thermal residual strains and stresses in silicon carbide-fiber-reinforced silicon nitride composites |
| Douglas S. Cairns, Larry B. Ilcewicz and Tom Walker | 1087 | Far-field and near-field strain response of automated tow-placed laminates to stress concentrations |
| | 1099 | Announcement |

NUMBER 12

- | | | |
|---------------------------|------|--|
| Raouf A. Raouf | 1101 | A qualitative analysis of the nonlinear dynamic characteristics of curved orthotropic panels |
| R. M. Christensen | 1111 | On compressive failure of fibrous composites |
| A. Baz and T. Chen | 1119 | Torsional stiffness of NITINOL-reinforced composite drive shafts |

Z. Gürdal and G. Gendron	1131	Optimal design of geodesically stiffened composite cylindrical shells
C. A. Ie and J. B. Kosmatka	1149	Saint-Venant elasticity solutions of a tip-loaded anisotropic cantilevered beam with an elliptical section
L. V. Smith and S. R. Swanson	1165	Response of braided composites under compressive loading
Marek-Jerzy Pindera, Robert S. Salzar and Todd O. Williams	1185	An evaluation of a new approach for the thermoplastic response of metal-matrix composites
	1203	Announcement
	i	Index for Volume 3, 1993
